POWER ON

Keep pressing on/off key 3 seconds, the phone power will be turned on.   The phone will register to default network and the service operator name will be displayed on the screen.   Please key in the right PIN digits when the phone requests the PIN code for your SIM card.   The phones default password No. is " 1122".

POWER OFF

Long pressing On/Off key 3 seconds, the phone will be turning off automatically after the off animation is displayed. Don't take out the battery pack to power off the phone or it might make the SIM card loss or erase the memory of Phone.

Insert T-Flash card

The phone only recognizes the compatible T-Flash card. It might damage the T-Flash card or phone if the T-Flash card is not compatible with the phone.

Take out the battery pack from the phone and you can find the T-Flash card slot.   Please insert the T-Flash card correctly and make sure the Golden fingers of T-flash are adown to the slot.

USB CABLE

This phone supports USB port and you can exchange the data between phone and computer through USB cable.

NOTICE：

●   Please turn off the power before the USB cable is to be connected with computer. The computer will display the phone as a removable disk when you enter the mode of "my computer". If there is no removable disk icon, please check whether the cable is connected well with either phone or computer.

7

● If you connect the USB with computer when phone is on, the phone will show an option list on screen, please select SAVE then click left key to confirm it.   After phone turns the power off automatically, you can start transferring files between computer and phone

● When you finish the data exchange, please double click the right key of computer mouse on the icon of removable disk displayed. Please make sure that you close the file of T-Flash first to avoid any data transferred from being unsaved. The computer will pop up a window to remind you if you want to stop connection with the phone (removable disk) and you just click to confirm. Now it's safe to disconnect the USB cable from the phone.

Warning:

Failure to follow the above instruction might result in damage to or loss of your data stored either on computer or T-flash.

Before starting the phone

Please insert the SIM card and T-Flash card then put the battery pack to the phone.   Press on/off key to turn the power on.

（PIN）

■ PIN will help avoid your phone and SIM card from being used by others without your authorization.

The phone will request you to input the PIN code when you turn the phone on.

.

If you enter the wrong PIN code number 3 times, the SIM card will be locked until you get a right PUK code to unlock it.　Please contact your SIM card operator in case the SIM card is locked.

SIM CARD AND BATTERY

■ Insert SIM card

The SIM card slot is located beneath the battery pack. Please remove the battery pack and make sure that the SIM cards golden fingers face down to the slot.

■ Insert battery pack

Remove the battery cover; put the battery pack into phone.

■ Charging battery

Connect the charger cable into phones USB slot and insert the charger adapter to power socket. The phone will display the charging icon on the screen to let you know that the charging is in process.

■ Low battery Alert

The phone will pop up the low battery alert when the battery energy is not enough and it will also have alert tone to remind you to charge the battery until the battery energy is completely run out.

■ Battery charging procedure

Plug the power adapter into power socket and insert the cable to phone USB slot to phone.

The battery icon appearing on the screen shows that the phone is in the charging process.

When the phone is in off mode, the phone will display charring animation on the screen.

The phone will stop charging when the battery is full. Please disconnect the cable with phone ASAP.

Caution:

If you don**'t charge the battery over 2 days, the phone will go to slow charge mode.**

1、   Please do not change the component of battery pack or open the battery pack.

Please use our approved accessories to avoid any damage to the phone.

2、   The temperature of battery charging environment must be between 0℃-40℃.   Please don't charge the battery out of the above-mentioned temperature range.

Notice:

The phone, battery and charger will be heated and it is normal phenomena.   To avoid any accident, please do not cover anything on phone, battery and charger when it is in charging.

Email profile：**Set email address and email account parameter. Beware that the phone doesn't support SMTP security check and SSL connecting mode.**

Maintenance and maintenance

Your phone is a good product design and technology should be used carefully. The following suggestions will help you perform the obligations in terms of the warranty to extend the life of the phone.

Note：

1. Please phone and all its parts and accessories on the reach of local children。

2. Maintain the phone dry. Rain, humidity and all kinds of liquid or water may contain minerals, corrosion electronic circuits。

3. Do not have dust or dirty cell phone use or storage. This will damage its removable parts。

4. Do not hold the phone kept in the overheating of more than 60 degrees Celsius not. High temperature will shorten the life of electronic devices, damage batteries, some plastic parts deformation or melting。

5. Do not hold the phone stored in a cold place not less than 15 degrees below zero. When the phone or elevated temperature (up to room temperature), will form its internal moisture, it would damage circuit boards。

6. Do not try to open the phone. Non-professionals on the phone's address will damage your mobile phone。

7. Do not throw, beat phone or vibration. use crustily phone destruction of the internal circuit boards。

8. Do not use strong chemicals, cleaning agents or phone-cleaning detergent。

9. Do not use paint smear phone. Will be applied in the removable parts of obstructive debris thus affecting the normal operation。

10. The replacement antenna, use only accredited or supporting the antenna. Unauthorized antenna, modified or annex

will damage your mobile phone and radio equipment in violation of the relevant provisions。

All these proposals are equally applicable to your phone, battery, charger and various accessories. If they can not work properly, please sent to the distance you've recently qualified maintenance organizations. If necessary, where the staff will help you for maintenance。

*RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types P168C (FCC ID: WEM0806P168CA0001) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.447 W/kg and when properly worn on the body is 0.183 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.　These limits are designed to provide reasonable protection against harmful interference in a residential installation.　This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.　However, there is no guarantee that interference will not occur in a particular installation.　If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help
